

Name - Suresh Dub(2021A1R030)

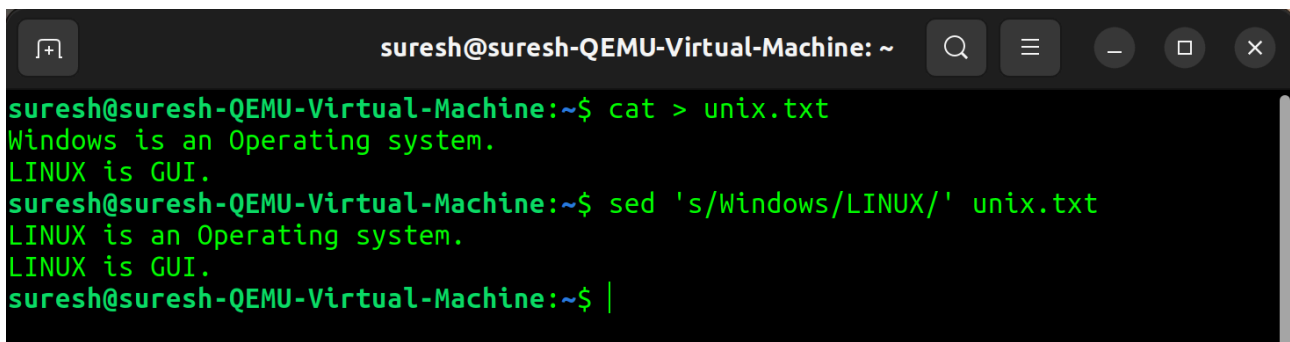

Experiment :3

- Use the date and who commands, in one line, such that the output of date is displayed on the screen and the output of who is redirected to a file. Use the more command to check the content of that file.

```
suresh@suresh-QEMU-Virtual-Machine: ~  
suresh@suresh-QEMU-Virtual-Machine:~$ date; who > file.txt  
Wed 09 Nov 2022 02:48:27 AEST  
suresh@suresh-QEMU-Virtual-Machine:~$ cat file.txt  
suresh      :0                2022-11-09 01:33 (:0)  
suresh@suresh-QEMU-Virtual-Machine:~$ |
```

- Write a sed command that swaps the first and second words in each line in a file.

```
suresh@suresh-QEMU-Virtual-Machine: ~  
suresh@suresh-QEMU-Virtual-Machine:~$ cat > unix.txt  
Windows is an Operating system.  
Linux is GUI.  
suresh@suresh-QEMU-Virtual-Machine:~$ sed 's/Windows/Linux/' unix.txt  
Linux is an Operating system.  
Linux is GUI.  
suresh@suresh-QEMU-Virtual-Machine:~$ |
```
